

Assignment 1.: Presentation on how your research relates to B5G/6G

Dr. Suyong Eum

1st Semester, 2023

1 Description

The aim of this assignment is to understand the things that B5G/6G will bring to our society as you prepare this presentation on how your research relates to B5G/6G. While some of you can find the relation straightforward, others may have some difficulty to connect them directly. However, if you understand what B5G/6G will bring in near future, you should be able to find some kind of connection, at least, indirectly. By the way, when I asked to chatGPT¹ the relation between carrot and B5G/6G use cases, it gave me a plausible answer. In this sense, I think you can figure out a relation between your research and B5G/6G. In addition, another aim of this assignment is to develop a presentation skill. In other words, your PPT delivery skill as well as your preparation of the PPT slides will be evaluated simultaneously.

2 Required Task(s)

In this assignment, you are expected to prepare a 6 minute-presentation which introduces your current research to your colleague, especially focusing on how your research relates to B5G/6G. In the presentation, you need to

1. Explain your research briefly in a way that even your grandmother can understand it.
2. Answer the following questions.
 - (a) Why are you doing the research?
 - (b) What would be a potential application out of your research outcome?
 - (c) How is your research related to B5G/6G?
3. Keep in mind that your presentation finishes within the time, e.g., let's say 6 minutes \pm 30 seconds.

Your presentation will be evaluated by your colleague and me. Once again, some of us including myself may not be familiar your research work, so please make sure that your explanation is general enough to help us understand your presentation.

3 Administrative

Please, send me your slide by the deadline and I will put them into a laptop, so that we can save some time by sharing the machine during the presentation.

- Due: 24:00, July 24, 2023
 - The presentation will be held on July 27, 2023
- Submission to (suyong@ist.osaka-u.ac.jp)
 - Any format, e.g., PPT or PDF, is fine. Then, zip the file.
 - Please, name the file with your student number and assignment number, e.g., 32A18041_1.zip
- Late submission will be penalized at the rate of 10% reduction per day
